

## Instructions for Exporting

1. In the timeline (sequence) make sure that your entire movie appears under the work area (the gray line)

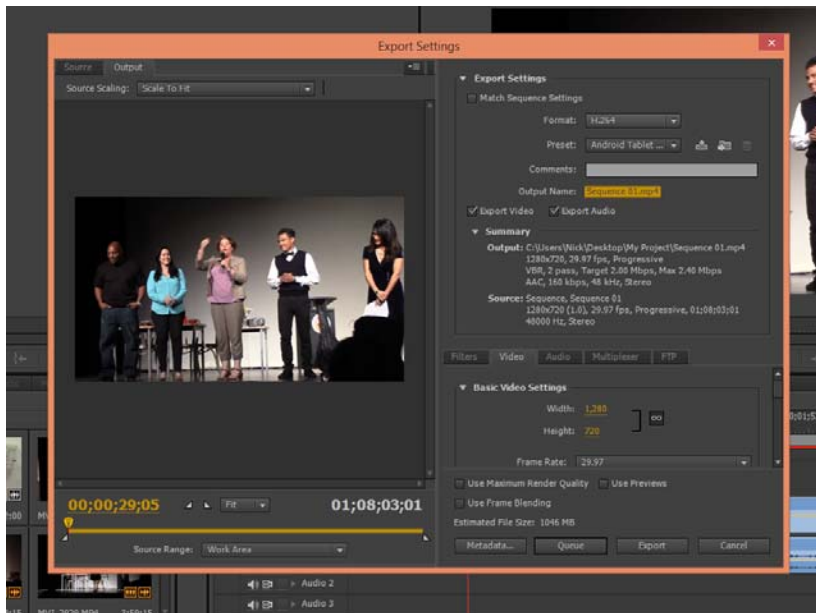

If it does not, click and drag the orange ends of the work area until your entire movie is under the grey line that indicates the work area.

2. Select on the menu File>Export...>Media (Note: if the word "Media" is grayed out, then exit the menu and click on the sequence so the yellow line around it appears. Then retry.)

3. A new window will open. Change the Following settings:

- a. Format: H.264 (not Blu-Ray)
  - b. Preset: Android Table 1080p 29.97
  - c. Output name: Double click on the name in yellow. Find the directory that your clips are stored in and click on it. Change the file name to the name of your movie followed by your name. Then click [Save].
  - d. Then click on [Export].
4. After it exports, upload the file to School Loop.
